**Transportation Evolution in the Upper Midwest and Potential Impacts on Wood Product Movements**

This presentation will focus on current and future trends in rail, highway, marine and intermodal transportation in the Upper Midwest. There will be a presentation of factors such as economics, market forces, globalization, regulations and supply chain issues that are driving changes in transportation management. The potential impact on the movement of wood dependent products from raw logs to finished products will be discussed interactively with the audience.

Duration 60 Minutes including Q&A
