

ADVANCED SILVICULTURE FOR THE LAKE STATES

April 2018

6 online sessions plus 5 days in-person at the Cloquet Forestry Center

In collaboration with the US Forest Service's National Advanced Silviculture Program, we are offering a 11-day online and in person Lake States silviculture course in April 2018.

This course will be open to anyone, not just Forest Service employees. It will offer an excellent opportunity for leadership development and relationship building grounded in practical silviculture and forest management.

The course consists of six days of online and independent or small group project work followed by 5 full days of in-person instruction at the University of Minnesota's Cloquet Forestry Center. Content will focus on the ecology and silviculture of Lake States forests focused on practical management issues unique to Lake States forests. In-person sessions will include project work, group presentations, classroom, and field sessions.

While we will address many topics, two prominent themes will be discussions and examples of projects using Good Neighbor Authority and using climate adaptation tools when developing silvicultural prescriptions.

Dates: Online: Mondays and Thursdays during the weeks of April 2, 9, and 16, 2018. In person: April 23-27, 2018 at the Cloquet Forestry Center.
