2015 Workshop: DNR Climate Change Adaptation

DNR Climate Change Adaptation Workshop

Save the Date!

September 22-23, 2015
Cloquet Forestry Center

An active, hands-on training to help DNR natural resource managers incorporate climate change considerations into their own real-world projects.

This workshop has been developed as part of the [Climate Change Response Framework](#), a collaborative cross-boundary approach to incorporate climate change into natural resources management. Specifically, participants are provided with training on climate change and its effects on forest ecosystems. The course uses the [Forest Adaptation Resources](#) guide to consider how climate change may affect a real-world forest management project, identify challenges and opportunities for management under a changing climate, and develop actions to reduce risk and increase the ability of forests to cope with change.

This offering is open only to Department of Natural Resources employees. We require participants to **select a real-life forest management project** relevant to their job and location to use during the workshop. Following the workshop, the manager can decide to implement the adaptation actions that were identified to serve as examples for other managers.

Date: Tuesday and Wednesday, September 22 & 23, 2015

Instructor: [Stephen Handler](#), NIACS

Fees: \$75 total for two days, lunches included

Brian Palik gave a great talk yesterday called Adaptive Silviculture for Climate Change: Lessons for timber-oriented managers.

If you missed it, here's the recording:
