2017 Workshop: Designing Timber Sales for Wildlife

A well-planned and designed timber harvest can improve wildlife habitat. But not all harvests are created equal. With both classroom and field activities, we will review the basic needs of wildlife species, then take a practical look at timber sale design to meet the needs of both game and non-game species.

(This workshop is offered in partnership with the Minnesota Logger Education Program)

Date: Thursday July 13, 2017

Location: Sawmill Inn, 2301 US-169, Grand Rapids, MN 55744

Brian Palik gave a great talk yesterday called Adaptive Silviculture for Climate Change: Lessons for timber-oriented managers.

If you missed it, here's the recording:
