ECS Silviculture: Mesic Hardwood Forests (Remer area)

In recent years, the MN DNR-Forestry Ecological Classification Systems team has developed silvicultural guidance for forest managers. Highly flexible based on silvicultural objectives, this guidance offers detailed insights into plant community development, opportunities to modify stand composition in various ways, techniques to accelerate development of later growth stage characteristics, and much more decision support. In this event, we'll tour mesic hardwood communities managed by DNR-Forestry and the Itasca County Land Department. Discussions will be wide ranging based on attendee interests, but will focus on managing for hardwood quality (yes, that's possible in northern Minnesota!), ironwood management, and related topics.

- Date:** Tuesday, Sept. 13 from approximately 9am to 3pm
- Location:** Field sites between Remer and Cohasset, MN
- Speakers:** Ashlee Lehner (MN DNR-Forestry), Jesse Lehner (Itasca County Land Dept.), and Eli Sagor (UMN-SFEC)
- Cost:** \$75 for SFEC members, \$140 for nonmembers, \$40 students
- CEUs:** TBD.

Brian Palik gave a great talk yesterday called Adaptive Silviculture for Climate Change: Lessons for timber-oriented managers.

If you missed it, here's the recording:
